

# Onclick Call To Action Popup Script

In this guide I will be showing you how to implement a simple onclick call to action popup script into your mobile landing page.

You can use this script to tell visitors what they need to do once they go through to the offer page, add an increased sense of urgency, reaffirm a specific point, congratulate and much more.

**Step 1:** With in your call to action link you will need to add an onclick event.

```
1 onclick="alert('Hello I am a on click CTA alert')
```

Your call to action link would look similar to this example

```
1 <a href="http://www.google.co.uk" onclick="alert('Hello I am a on click CTA alert')">Click Here</a>
```

(You can edit the text in between the " marks and add new paragraphs by adding \n\n at the end of a word or sentence.)

You can download a working example of a onclick call to action popup script by clicking the link below.
